Analysis	Sentiment analysis Covid-19 (not a survey)	MBIE	Using text analytics, this is an ongoing and detailed tracker of NZ's digital media, social media (and other sources) in the context of businesses and the numerous impacts of Covid-19. Text Ferret is a NZ-based text analytics agency which uses Natural Language Processing (NLP) to determine the 'business' sentiment from certain types of text-based data (from abovementioned sources). currently included in policy observatory research note 5 https://thepolicyobservatory.aut.ac.nz/data/assets/pdf_file/0010/376831/Research-Note-5-for-website.pdf	Media - Part of MBIE's better for business collaboration	Weekly until end of November

Survey	National Survey of Employment Intentions	MBIE	This survey will be undertaken in two waves, with the second wave re-surveying respondents from the first wave who agree to be re-contacted. The sample has been drawn from Statistics NZ's Business Register and represents all employers (large and small firms). The survey will be conducted online. Topics include current staffing levels compared to pre-lockdown numbers, workplace arrangements and future employment intentions (hiring of new staff, currently, in six months and 12 months' time).	2,000 businesses for Wave 1.	Questionnaire Finalised
Survey	Migrant Survey	MBIE	Survey of migrant settlement and labour outcomes, carried out every year since 2009 as part of the Immigration Survey Monitoring Programme. The questionnaire changes every year and this year's one hasn't been set yet	Achieved sample is 2000+, stratified across multiple residence and temporary work visa types	In design
Survey	Covid 19 Business Health Survey	MBIE	The survey gathers information about how businesses are currently tracking and how they are being impacted by COVID-19. The survey results will allow MBIE and other government stakeholders to understand what additional support and information businesses may require as we move into a phase of economic recovery. The survey period closes on Monday 11 May and we will be following with some more in-depth reporting of the total responder base – representative of all NZ businesses by industry and size.	Achieved sample will be around 1000 respondents – all of which have previously responded to the general B4B research monitor in the past 18 months.	Baseline just completed – results available from Monday 11th May.
Database	MBIE COVID Research Database	MBIE	Central source of data about COVID-19 research and funding https://www.mbie.govt.nz/assets/covid-19-research-database.xlsx	Researchers and funders submitted their data	ongoing
Survey	Survey of small businesses - wave 2 of business health survey	MBIE	This survey will build on B4B's regular survey series of small businesses, delivered by Research New Zealand. To include questions on small business uptake of Covid-19 packages. Contains deep dive into the digital capabilities, motivations and barriers of NZ businesses Questionnaire TBA	Small businesses	In design
